EGL EXPANDS INTO SOUTH EAST ASIA

The Environmental Group Limited (ASX: EGL) today announced the company's expansion into South East Asia, via its 100% owned subsidiary Total Air Pollution Control Pty Limited ("TAPC"). Furthering its long standing relationship with GE Energy Environmental Services ("GE") in Australia and New Zealand, the company will now also represent GE through sales offices in Singapore and Manila.

EGL's CEO, Mr. Bill Highland commented "GE's willingness to provide TAPC access to its SE Asian installed customer base is recognition of TAPC's ability to provide superior customer service. With first year sales of approximately \$2m, this provides the company with a low risk and profitable geographical expansion into a readymade market with a strong industrial growth profile."

The company has been fortunate to secure the services of experienced GE staff with many years experience in both the region and industry.

TAPC brings with it not only the current range of high quality GE products, but also an expanded range of products and services to help customers achieve the best possible air pollution control outcomes. The company will provide a complete range of services from quality replacement parts, filtration units and other consumables to complete turn-key projects.

For further information, please contact Mr. Bill Highland on (02) 8858 3499.
